

01 / GET TO KNOW YOUR HOME ON WHEELS

New owner. Week one, sorted.

A practical starting point. Follow your rig and component manuals.

YOUR RIG _____

DATE _____

01

Know your rig

- ☐ Record height, length, weight ratings and tire specifications.
- ☐ Locate your owner's manuals, emergency exits and shutoffs.
- ☐ Learn fresh, gray and black tank capacities and fill/dump procedures.
- ☐ Identify your electrical connection and onboard battery system.
- ☐ Check the working condition of smoke, carbon monoxide and propane alarms.

02

Before you go

- ☐ Check tires cold using the manufacturer's pressure/load guidance.
- ☐ Confirm hitch, coupler, safety chains and breakaway setup as applicable.
- ☐ Check running lights, turn signals, brake lights and mirrors.
- ☐ Secure loose items, doors, roof vents, awnings and slide-outs.
- ☐ Confirm actual campsite size, access, hookups and arrival process.
- ☐ Download maps and keep a printed backup of important information.
- ☐ Carry potable-water equipment separate from waste equipment.

02 / SETTLE IN. LEAVE WELL.

Good habits. Better miles ahead.

Keep this page handy at camp, then make it part of your departure routine.

03

At camp

- ☐ Walk the site before parking; look for overhead and ground hazards.
- ☐ Follow the rig manual for parking, leveling and stabilizing.
- ☐ Check the pedestal and use compatible electrical equipment.
- ☐ Learn the location of potable water and an approved dump station.
- ☐ Respect posted quiet hours, fire restrictions and local camping rules.

04

Before departure

- ☐ Disconnect and stow utilities using the procedures in your manuals.
- ☐ Secure the inside; retract and latch all exterior equipment.
- ☐ Walk around the rig twice and check above and below it.
- ☐ Leave the campsite clean; pack out waste.

What did you learn?

Something to bring next time _____

Something you didn't use _____

One system to learn better _____
